

Drivers: See it? Report it!

Help us keep our fleet safe, reliable, and road-ready!

\$100k

average annual spend on physical damage repairs

25%

of physical damage repairs were due to unreported issues

Why Reporting Damage Matters

Prevents Bigger Problems:

Small dings become costly breakdowns if left unchecked.

Protects You & Others:

Damaged equipment can put you and other drivers at risk

Keeps Us Compliant:

Unreported damage can result in DOT violations & fines

Boosts Equipment Life:

Regular reporting helps us repair issues fast and avoid long-term wear

What to Watch For

- ✓ Scratches, dents, or cracks in the body, mirrors, or lights
- ✓ Broken or missing parts (mudflaps, reflectors, etc.)
- ✓ Leaking fluids or unusual tire wear
- ✓ Any signs of impact or structural damage

How to Report

1. During Pre/Post Trip Inspections: Note any damage in your DVIR
2. Call your DM or Shop: If it's urgent, don't wait. Let dispatch or maintenance know right away. If there's an accident, make sure to fill out an accident report and include photos of damages.

Remember: If you see it, say it.

Reporting damage isn't about blame- it's about responsibility, accountability, and keeping each other safe.
